WORK EXPERIENCE

01.02.2023 - Develop WPS-blog app using Laravel, ReactJs, Mysql and RestAPI:
- This web application serves as a virtual CV for companies, showcasing the full range of services offered, as well as providing a platform for customer testimonials and product images and videos. The application also allows for the creation of profiles for each team member, providing a personal connection with clients.
  Github backend:https://github.com/paduCosty/wps_blog_be
  Github frontend: https://github.com/paduCosty/wps_blog_fe

01.05.2022 - Develop my personal project using PHP, Laravel and Jquery:
- https://github.com/kraleba/KRALEBA, Kraleba is an application in which the customer keeps track of the materials delivered by suppliers and from those materials can create a product (a shirt, a saddle...). The application is strictly focused on clothing products.

15.03.2022 - **Full stack web developer PHP, Codeigniter and JS (jquery):**
- I worked at Reea on the development of the https://eeatingh.ro/targu-mures.html application. For this project, I developed numerous functionalities, including a black list for unruly customers, a functionality that sends SMS messages to the delivery drivers when the order has been taken over by the call center, a list in which fields can be sorted by several categories, and many others.

01.08.2021 - **Backend web developer at SwiftNet using PHP & Symfony:**
- I've been working on the development and maintenance of the product SwiftPod https://site.swiftpod.io/
- **SwiftPod** develops a CRM in Citrix Podio (https://podio.com) through API, and the CRM particularly focuses on the companies which develop a real estate business in SUA, having different partners which trade million dollars a month.

EDUCATION

04.11.2019 - 01.08.2021 Studied the WellCode courses (https://wellcode.com/):
- Learned to solve algorithmic problems in **C++, Object-Oriented Programming** in **Java**, databases with **Mysql**.
- Built some mini-projects:
  - **Sudoku** (in **JavaScript**) https://paducosty.github.io/Sudoku/

HOBBY
- Martial arts (Qwan Ki Do)
- Self-development and organization.

SKILLS
- 2 years of web development experience with technologies such as PHP, Laravel, MySQL, Git, JavaScript, ReactJS, and jQuery. Skilled in building robust and scalable web applications, writing complex database queries and collaborating with remote teams.
